

## XTC SIX12 Side Mirrors

Thank you for purchasing XTC Power Products Side View Mirrors with Rigid Lights Built in. The Amber Backlights can be used as marker lights or can be wired to be used as Turn Signals.

**Please read the instructions fully and familiarize yourself with the components before starting the installation. The diagram below shows the overall system layout.**

1. Verify that you ordered the correct kit for the size of your roll cage pillars.
2. Using the supplied Axia Alloy mounts, install mirrors on each pillar, verify that the Rigid is reading correctly as shown.

3. Install the wiring harness. The kit comes with a standard 36" power cable, optional Plug & Play power cables can be purchased at [www.xtcpowerproducts.com](http://www.xtcpowerproducts.com).
4. Run a plug from the harness to each light and plug in.
5. Mount the power switch in the dash.
6. Run the power wire to Keyed power, bottom LED on the switch and the Amber Backlights will come on with the key.
7. Verify operation. Secure wire harness with supplied Zip Ties

Optional if using the mirrors as Turn Indicators.

1. The Amber Backlight can be wired to be used as turn signals. The white wire is the backlight.
2. Cut the white wire away from the plug as far as possible, leaving at least 2" out of the plug.
3. Using a butt connector attach the green left turn signal to the driver's side Mirror white wire that was coming from the plug.
4. Do the same for the passenger side mirror, attach the yellow wire to the white wire coming from the plug at that mirror.

See Diagram on reverse side.
